

serviacero[®]
ORBIS[®]

In **Serviacero Orbis** we design and manufacture returnable packaging solutions, containers and steel racks with cutting, bending, welding, powder painting and assembly processes for the industry.

ORBIS[®]

Powered by Menasha Corporation

ORBIS Corporation, a subsidiary of Menasha Corporation, is a leading manufacturer of returnable and reusable products for a wide range of material handling applications.

SERVICES

Consulting

In Serviacer Orbis, we advise to our customers, supporting them in designing steel packaging to move their manufactured parts, taking into account the density of the packaged parts, the ergonomics of the operating personnel and the safety of the people who will work with the packaging solution.

We count with the required support, the latest design systems, highly trained personnel, and enough experience to provide and serve the specific requirements of each client and their projects.

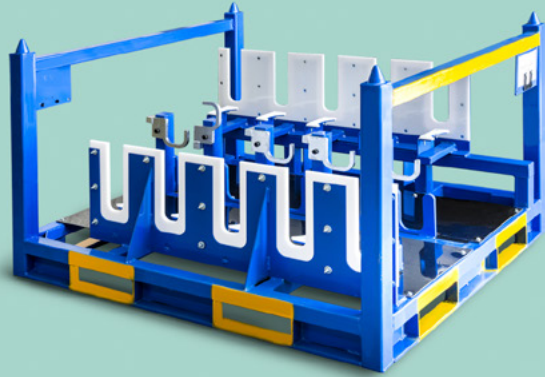

Engineering

Serviacer Orbis has a highly trained team to develop and design your requirements, offering the highest quality standards to our customers.

Prototype Building

In Serviacer Orbis, we strive in giving the best attention to our customers, that is why we have a specialized team to build the prototypes, so that our customers can validate their projects before they enter into the production lines.

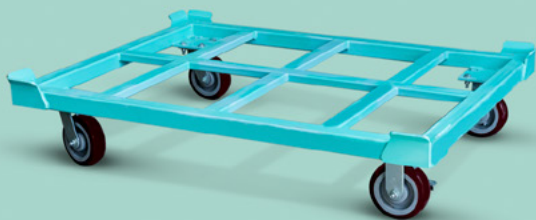

Steel Rack

Packaging solution that can be used indoor or outdoor.

Rack with Mechanism

This kind of packaging guarantees the product position, ensuring the repeatability.

Dollies

Packaging solution designed to move parts, offering ergonomics, safety and efficiency in the product flow to our customers.

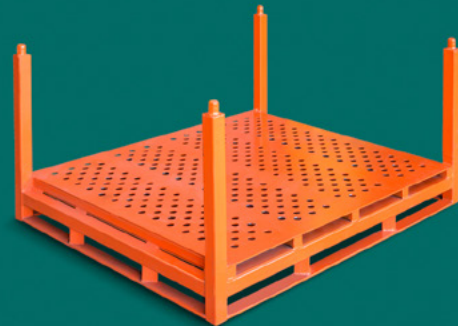

Rack with bag

Packaging solution used for class "A" parts.

Steel Container

Ergonomic packaging solution used for bulk parts handling.

Pin Pallets

Portable metal platform that can be stackable, used to concentrate products, allowing an easy movement of the customer parts.
